**Subject:** Docket No. 2005-385- E---Net Metering.

This is to urge you to institute a policy of net metering in South Carolina, as soon as possible. The State needs to join the other states that require public utilities to purchase surplus power from their residential customers. Requiring utilities to purchase surplus power would increase the use of renewable energy, improve environmental quality, and reduce our dependence on both domestic and foreign fossil fuels.

Thank you very much for considering my comments on this extremely important matter.
